

Exceed Peat Crownvetch

Treats All Varieties of Crownvetch and Sanfoin

GENERAL INFORMATION

Exceed Peat Crownvetch contains beneficial rhizobia that is specific to the crownvetch plant. When Exceed Peat Crownvetch is mixed with crownvetch seed, the rhizobium allows the plants to produce their own nitrogen fertilizer, thus saving on fertilizer costs. Exceed Peat Crownvetch contains billions of live bacteria that are essential in the nitrogen fixing process of garden legume plants. Exceed Peat Crownvetch enables the plant to produce its own organic source of nitrogen, leading to more lush vine growth and ultimately greater yields. Exceed Peat Crownvetch is legume specific. It treats all varieties of crownvetch and sainfoin.

DIRECTIONS FOR USE

Slurry Method: The optimum method for applying Exceed Peat Crownvetch is the slurry method. In a container outside of the planter box, dampen the seed with non-chlorinated, clean, cool water at a rate of 8.5 ounces of water per 50 pounds of seed. Add appropriate amount of inoculant (2.5 ounces per 50 pounds of seed) and mix water, seed, and inoculant thoroughly until seed is uniformly coated. Allow 1 to 3 minutes for mixture to dry and then plant as soon as possible.

Applied Directly to Seed: Exceed Peat Crownvetch can also be applied dry directly onto the seed. Mix seed and inoculant thoroughly until seed is uniformly coated. Layering seed and inoculant will aid in this process. NOTE: Maximum seed adhesion will not be obtained by applying this product dry.

For Seed Pre-Treated With Fungicide: Applying the inoculant dry is recommended for seed that is pre-treated with fungicide. NOTE: Maximum seed adhesion will not be obtained by applying this product dry.

For New Legume Soils: For soils that have never been host to the legume being planted, apply Exceed Peat Crownvetch at a 1.5 to 2.0X rate, or use Exceed Peat Crownvetch with a liquid inoculant product.

TECHNICAL INFORMATION

Specific Gravity: 0.6

pH: 6.5-7.4

Solubility: Insoluble

Color & Appearance: Dark Brown Powder or Granules

Odor: Earthy

Incompatibilities: Some seed-applied chemicals, including fungicides, may be harmful to the bacteria in this product.

Storage Temperature - Minimum: 40°F. Do Not Freeze!

Storage Temperature - Maximum: 120°F

DOT/IMDG Transportation: Not Regulated

MINIMUM GUARANTEE OF STATED

CULTURE: Contains a Minimum of 200 Million (2×10^8) Viable Cells of Rhizobium Coronilla

PACKAGING

1.5 ounces per poly bag

80 poly bags per carton

3 cartons per case

CV15 treats up to 15-lbs of seed

Item#: CV15

Use Before Expiration Date Printed on Package

Reviewed and Approved by OMRI
