

Legacy™

Dual Action Inoculant for Soybeans

GENERAL INFORMATION

One LEGACY carton contains a two-part system:

- Super-Concentrated Liquid Inoculant;
- Chitosan Based Bio-Stimulant

When the two parts of the system are combined, the resulting mixture is a ready-to-apply seed inoculant containing live bacteria and a bio-stimulant/extender agent formulated to inoculate 50 units (2,500 pounds) of soybean seed.

On-seed survival of bacteria can last as long as 95 days after application.

Sequential application of separate seed treatment products is recommended for best results.

USE RATES FOR SEED TREATMENT

Apply 0.4 fluid ounces of Legacy per 100 pounds of seed. Apply as water-based slurry through standard slurry or mist-type commercial seed treatment equipment.

Apply at a rate of 2.5 fluid ounces per 100 cwt, or 1.25 fluid ounces per 140,000 seeds. This application rate is based upon 2,800 seeds per pound.

The LEGACY duo-pak inoculates 2,500 pounds of seed.
