

## Citrix™

### PENETRANT / WETTING AGENT / SPREADER

#### GENERAL INFORMATION

Citrix is intended for use with products registered for agricultural, horticultural, turf, ornamental, industrial and non-crop use as a tank mix adjuvant. The unique surfactant chemistry provides enhanced wetting and absorption of nutrient and crop control tank mix partners that recommend the addition of an adjuvant to improve performance. Use Citrix for superior spray application spreading, penetration and uniform distribution of the spray application. The nonionic surfactant component in Citrix assists with the spreading and infiltration of the spray deposit.

Citrix may be used with most herbicides\*, fungicides, insecticides, plant growth regulators\*, defoliant\*, and fertilizer products in keeping with instructions on the accompanying crop protection or fertilizer label.

\*NOTE: The state of California does not permit the use of Citrix with herbicides, plant growth regulators or defoliant.
