

Breakaway II™

WATER CONDITIONER / NIS / HUMECTANT / DRA / DEFOAMING AGENT

GENERAL INFORMATION

Breakaway II is a convenient premix that combines water conditioning, drift reducing technology, surfactant, and humectant in an easy-to-use formulation.

The performance properties of Breakaway II can eliminate antagonism caused by hard water ions, reduce off-target drift, improve spray droplet spreading and leaf penetration, and slow drying time of active ingredients for enhanced uptake.

Breakaway II can be used with a wide range of pesticide and nutrient spray mixtures when accompanying labels recommend water conditioners and spreader-wetter adjuvants, including glyphosate, dicamba, and other pesticide products.

Breakaway II has clearly demonstrated effective performance and is available for use as an all-in-one adjuvant for Xtendimax®, Engenia® and Tavium® dicamba applications to effectively manage hard water, spray volatility, impart surfactancy, reduce spray drift, slow spray droplet drying time and suppress tank mix foam when applying dicamba.

USE RATES

For Use as a Drift Reduction Agent for XtendiMax® and Engenia® Tank Mixes: Use 4 pints per 100 gallons in the spray mixture. Do not use this product at a rate to exceed 0.625% v/v of finished spray tank mixture.

For Use as a Drift Reduction Agent for Tavium® Tank Mix: Use 5 pints per 100 gallons in the spray mixture. Do not use this product at a rate to exceed 0.625% v/v of finished spray tank mixture.

Ground/Aerial for Water Conditioning/Buffering: Use 1 to 4 quarts per 100 gallons of spray mixture.
